

## **CIRCULAR TO ALL GTA MEMBERS**

Dear GTA Member,

Last Friday the Government of Malta published Legal Notice 203.21 establishing the Vaccination against COVID-19 certificate Order. Copy of this Legal Notice is being attached for your information.

This legal Notice states that people who have been fully vaccinated in Malta may ask the Superintendent of Public Health to issue them with a vaccination certificate to enter a country outside the European Economic Area. It will be made available in digital or paper-based format and will only be valid for six months.

A new certificate will be re-issued if it expires, if it's no longer available to holder, or if the personal data contained in the certificate needs to be updated.

For statistics, research and audit purposes, the Superintendent of Public Health will be allowed to retain a record containing the unique vaccination certificate identifier, so long as its holder cannot be identified.

**No personal data in relation to vaccination certificates can be further processed by the Superintendent for a purpose that goes beyond the scope of these regulations.**

Thanks and best regards
